

**TITLE**  
sGG Extra View

**SUBTITLE**  
High Advanced Extra View Series

**DESCRIPTION**

Saint- Gobain, as a high quality glass supplier, provides quality products for urban landmark buildings, large exhibition venues and super high- rise buildings etc. around the world. Saint- Gobain its high- performance coating is outstanding in energy- saving performance and ideal for processing, and is in the top flight of the sector. Saint- Gobain has presently applied the stable and mature coating technology in the Extra View series products. The products have been further upgraded in visible light transmittance, showing a remarkable visual effect, crystal- clear and translucent nature, with noble texture. Besides, the products enjoy a preeminent energy- saving effect on the whole. They have provided more flexibility for designers in designing buildings and curtain walls, and are suitable for external curtain walling or roof skylight, etc.

**PERFORMANCE**

Product	Structure	Face	Luminous factor (%)		SC	U value (W/m <sup>2</sup> ·K)	
			TL	RLe		Air	Argon
Extra View 79	6-12-6	2	79	13	0.70	1.7	1.3
Extra View 70	6-12-6	2	70	11	0.50	1.6	1.3
Extra View 60	6-12-6	2	60	15	0.42	1.6	1.2
Extra View 52	6-12-6	2	52	20	0.34	1.6	1.2
Extra View 48	6-12-6	2	48	18	0.47	1.9	1.6
Extra View 47	6-12-6	2	47	29	0.42	1.6	1.3

**ADVANTAGE**

**Aesthetics feeling:** Natural external appearance, with vivid color rendering performance and higher visible light transmittance, and perfect representation of architectural design innovation.

**Super safety:** sGG Extra View series products have provided high- level safety protection and are applicable to external glass curtain wall of high- rise building.

**Effective energy saving:** Thanks to the great thermal- insulating performance of sGG 's coating, which helps to improve the whole energy efficiency for the buildings.
